Research Ethics

The background is a solid yellow color. It features several white geometric shapes: a large circle in the upper left, a large circle in the lower left, and a large circle in the lower right. A thick white line starts from the top right, goes left, then down, then left, then down, then left, ending near the top right circle. Another thick white line starts from the top right, goes left, then down, then left, then down, then left, ending near the top right circle. A third thick white line starts from the top right, goes left, then down, then left, then down, then left, ending near the top right circle.

FAIR Principles in practice

FAIR Principles

Findable

- Create pattern for metadata
- Challenge: combination of different data spaces/data sets

Interoperable

- Use of FAIR vocabulary and reference to other metadata
- Challenges: TBD

Accessible

- Non-discrimination
- Challenge: restricted content → need for justification + authentication

Reusable

- Open-by-design + open license
- Challenge: hosting platform and sensitive information

AI Ethics

The background is a solid yellow color. Overlaid on this are several white geometric shapes: a large circle in the upper left, a large circle in the lower left, and a large circle in the lower right. These circles are connected by thick white lines that form a jagged, zig-zag pattern across the top and right sides of the image.

Use of AI in research activities

Human Oversight

Explicability

Use of data

Use of AI in research activities

RISKS/IMPACTS

- **ENVIROMENT**
- **PRIVACY**
- **DATA PROTECTION**
- **TESTING IN THE REAL WORLD**
- **DISCRIMINATION/BIASES**
- **LEVEL OF RISK – AI ACT**

POSSIBILITIES

- **EXPLORABLE RESULTS (TOOLS, DATASETS, ALGORITHMS)**
- **CREATIVE MITIGATION MEASURES**
- **LESS STRICT REGULATORY RULES FOR RESEARCH – ROOM FOR TESTING**
- **PREVENTION OF HARM BY DESIGN (TECHNICAL ROBUSTNESS AND SAFETY)**

HUMAN AGENCY AND OVERSIGHT

- Respect for human autonomy
- Human participation in the Machine Learning training
- Revision of automated decisions
 - Open data x restricted
 - Results of pilots
 - Redress mechanisms

EXPLICABILITY AND FAIRNESS

Procedures for data used for algorithms

- Data cleaning
- Synthetic data generator
- AI generated recommendations for data integration and harmonization

Transparency

Accountability

Diversity and non-discrimination

Privacy and data governance

Accountability

PILOTS

POINTS OF ATTENTION

- **(Personal) data use**
 - Inferred data
 - Sensitive data
- **Secondary use of the technologies/ algorithms/ results**
- **Regulatory framework**

BALANCE

- **Effects = positive x negative**
- **Proportionality**
- **Necessity**
- **Protection with little effect to the openness of the results**
- **Societal and environmental wellbeing**

Assessments

What to expect from ethical and legal activities

ASSESSMENTS

- Data Protection Impact Assessment
- Fundamental Rights Impact Assessment
- AI Act considerations
- Cybersecurity assessment

ONGOING

- Activities
- Workshops
- Questions
- Dialogues
- Engagement

The background is a solid yellow color. It features several large, white, abstract shapes that resemble stylized arrows or paths. One large shape starts from the top right and points towards the top left. Another shape starts from the top right and points towards the bottom right. A third shape starts from the bottom left and points towards the bottom right. There are also some circular white shapes scattered across the background.

QUESTIONS AND POINTS FOR FURTHER DEVELOPMENT

Thank you!
